Hand Carry Guidelines & Regulations

For the safety of all people and property, artists who wish to hand carry product out of the building afer the show closes must follow the guidelines below.

What counts as Hand Carry
Hand Carry applies to vendors who can remove all of their product in **one trip**, carried by hand, in a suitcase no larger than 30 inches, or on a beach cart. Beach carts may not be over-stacked.

Elevators
Passenger elevators across from booth **6075** may be used for single hand carry trips only. Freight elevators go directly to the dock and will not stop on any other floor including the 1st floor/lobby.

Exiting the building
Each vendor is allowed one exit trip from the 7th floor to their vehicle. Hand carry vendors may exit through any building door on the 1st floor/lobby. Your vehicle must be waiting in a legal parking space or parking lot, or be using "Load and Go" in a permitted area (see below).

Vehicle access and Load and Go
On the North and South Drive, no stopping, standing, parking, or extended loading is allowed.

"Load and Go" is permitted only on the North Drive, Orleans, and Wells (north, east and west perimeters of the building only). It works like an airport pickup: you wait at the curb with your items, the vehicle pulls up, the items go in the trunk, and the vehicle leaves. The entire stop may take ***no more than 30 seconds****.*

No standing or parking
Standing and parking are not permitted on any building drive or around the building perimeter. Private towing will be enforced on both the North and South Drives. On Orleans and Wells, the Chicago Police Department will enforce violations with ticketing and towing.

Thank you,

The One of a Kind Show Team
